Professional Summary

Detail-oriented Computer Science graduate with strong skills in **SQL, Python, Power BI, and Data Analysis**. Hands-on experience building **end-to-end analytics pipelines, star schema data warehouses, ETL workflows, and ML models**. Passionate about transforming raw data into actionable business insights.

Education

MIT World Peace University, Pune

CGPA: 8.53

B.Sc. Computer Science (Hons.)

Modern Jr. College, Akole — HSC: 73.67%

Marutirao Kote Abhinav Public School — SSC: 78.00%

Technical Skills

- **Databases & Query:** SQL, SQL Server 2025, T-SQL (CTEs, Window Functions, Stored Procedures)
- **Data Engineering:** ETL/ELT, Star Schema Design, Data Cleaning, Data Validation, pyodbc
- **Analysis & ML:** EDA, Feature Engineering, Linear Regression, Random Forest, scikit-learn
- **Visualization:** Power BI (DAX, Data Modelling), Excel Dashboards, matplotlib, seaborn
- **Programming & Tools:** Python (pandas, NumPy), Git, GitHub, Jupyter Notebook

Key Projects

Smart Irrigation Intelligence System (SIIS) – End-to-End Analytics

Jun 2026

- Engineered 3 KPIs (WSI, IES, Drought Risk) using Python; designed a star schema in SQL Server 2025 with 6 advanced T-SQL queries — CTEs, window functions (LAG, DENSE_RANK), and a stored procedure for zone alerts.
- Trained Random Forest model ($R^2=0.97$, RMSE=0.22); temperature identified as dominant feature (67.5% importance); 1,000 predictions exported back to SQL Server.
- Built a 3-page Power BI dashboard with DAX measures — Summer drought risk 2x higher than Monsoon; 91% of days flagged WARNING or CRITICAL.
- **Tools:** Python (pandas, scikit-learn, seaborn), SQL Server 2025, Power BI, T-SQL, DAX

Product Funnel & Retention Analysis

Jan 2026

- Analyzed customer funnel drop-off and retention trends using SQL (JOINS, GROUP BY, aggregations, subqueries) on structured product datasets.
- Built interactive Power BI dashboards to monitor conversion KPIs and retention curves across product stages.
- Generated business insights through cohort analysis and trend reporting; documented data sources and workflow logic.
- **Tools:** SQL, Python, Power BI

IPL Data Analytics

Jun 2025 – Aug 2025

- Analyzed 200,000+ IPL records (2009–2019) using Python (pandas, matplotlib) — data cleaning, transformation, and trend analysis on player and match performance data.
- Built Power BI dashboards to visualize team performance, win rates, and player statistics across 10 seasons.
- Automated repetitive reporting tasks using Python scripts, reducing manual effort in data aggregation.
- **Tools:** Python, SQL, Power BI

Certifications

- Google Data Analytics / Data Analysis with R Programming – Google (Coursera)
- Data Visualization: Empowering Business with Effective Insights – Tata Group (Forage)
- Introduction to Machine Learning – IIT Kharagpur (NPTEL)
- Oracle Certified Generative AI Professional (2025)
